

COVID-19 Vaccine Booster Shot (Third Dose) ~ Starting Dec.1 ~

Vaccination Process

1 Receive the voucher

Any person who received their second dose of the COVID-19 vaccine **more than 8 months ago** is eligible for the third dose. Your voucher will be sent just before the day you become eligible for the shot.

*Visit the Yamato City official website for the starting date of the booster shot registration.

2 Locate medical institutions/vaccination sites

Search **the city website** for available medical institutions or vaccination sites. Also, **medical providers may offer the vaccination at your workplace**. Please check your workplace.

General Vaccination Guidance Website
"Corona-vaccine Navigator"
<https://v-sys.mhlw.go.jp>

*Registration service is not available.

*Contact the Yamato City call center if you cannot find a medical facility or vaccination site.

*In general, the vaccination is provided by local municipalities with your certificate of residency (juminhyo), Exceptions are made for those under hospitalization or in a nursing home.

See the reverse side for vaccination in another municipality without your certificate of residency.

3 Registration for the vaccination

Free of charge
(covered by public funding)

Visit the city website or contact the medical institutions accepting registration.

Designated local medical institutions

The registration method varies for each institution
(phone, city website, etc.)

ID (My Number card, etc.)

Things to bring on the day of vaccination

All the items in the envelope with this notice.
ID (My Number card, driver's license, health insurance card, etc.)

*The envelope contains a **vaccination voucher** and a **questionnaire**. Please keep them in a safe place.

*Take your temperature at home, etc. in advance. If you have a fever or feel sick, do not receive the vaccination and contact the call center or medical institution where you are registered.

*Please wear **clothing with easy access to your shoulder** for the vaccination.

◎ **Vaccination in a municipality without a certification of residency.**

- Vaccination during hospitalization / at an institution where you are staying for a long period of time
→ **Consult the institution**
- Vaccination at a medical institution where you are undergoing treatment for a chronic disease
→ **Consult your institution**
- Those who do not live in the municipality indicated on your certificate of residency
→ **You may be able to receive vaccination in the area you actually reside.** Contact the website of the municipality where you reside or the information desk.

◎ **The recipient's consent is required for the vaccination.**

Please decide whether to receive the vaccination or not based on accurate knowledge about the vaccine's efficacy for infection prevention, the risk of side effects, and according to your own free will. The vaccination will not be given without the recipient's consent.

You should not force people around you or at the workplace to vaccinate or treat unvaccinated people unfavorably.

◎ **The relief system for health damage due to vaccination**

The vaccination may cause health damage (illness or disability). Though the incident rate is very low, it is impossible to prevent completely. The relief system has been established for such cases.

Contact the municipality with your resident certificate for the application procedure.

◎ **Please continue infection prevention measures, such as wearing a mask, even after vaccination.**

COVID-19 vaccines are proven to be highly effective for preventing COVID-19 symptom onset, but their efficacy is not 100%. Also, a variant of the virus may impact its effectiveness.

Therefore, we are asking everyone to continue infection prevention measures. In particular, avoid the Three Cs (crowded places, close-contact settings, confined spaces), handwash with soap, and sterilize your hands using an alcohol sanitizer.

Please continue infection prevention measures
